

# REMARKS

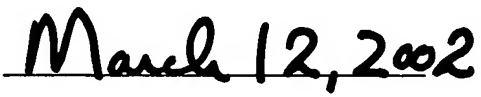

The amendment removes multiple dependencies from the claims. The amendment was not made for a reason related to patentability, and the full range of equivalents for all of the elements of the amended claims, as well as for all of the other claims, should remain intact.

A favorable consideration that results in the allowance of all of the pending claims is earnestly solicited.

Respectfully submitted:

  
Harry F. Smith

**ADDED PAGE(S) TO SHOW CHANGES MADE**

**IN THE CLAIMS:**

Amend the claims as follows.

3. A system (10) according to claim 1 ~~or claim 2~~ in which the supplying terminal (12) acts as a proxy between the mobile terminal (14) and the data server (18, 20).
4. A system (10) according to ~~any preceding claim~~ claim 1 in which transfer of electronic data between the at least one data server (18, 20) and the supplying terminal (12) is carried out securely.
5. A system (10) according to ~~any preceding claim~~ claim 1 in which transfer of electronic data between the supplying terminal (12) and the mobile terminal (14) is carried out securely.
6. A system (10) according to ~~any preceding claim~~ claim 1 in which the supplying terminal (12) is a vending machine which supplies electronic data in exchange for a monetary payment.
8. A system (10) according to ~~any preceding claim~~ claim 1 in which the mobile terminal (14) and the supplying terminal (12) communicate by the Wireless Application Protocol (WAP).
9. A system (10) according to ~~any preceding claim~~ claim 1 in which the wireless network (24) and the wireless connection operate using different carrier frequencies.
11. A system (10) according to ~~any preceding claim~~ claim 1 in which the wireless network (24) is provided by a cellular network.
12. A system (10) according to ~~any preceding claim~~ claim 1 in which the wireless

connection is a connection between the mobile station and the supplying terminal in a pico-cell.

13. A system (10) according to ~~any preceding claim~~ claim 1 in which the wireless connection is a Low Power Radio Frequency (LPRF) connection.

14. A system (10) according to ~~any preceding claim~~ claim 1 in which wireless network (24) obtains the data from a second network which is a wired network.

15. A system (10) according to ~~any preceding claim~~ claim 1 in which the wireless network (24) obtains the data from the Internet via a gateway.

16. A system (10) according to ~~any preceding claim~~ claim 1 in which the data transmitted to the mobile terminal (14) from the supplying terminal (12) is only part of the data transmitted to the supplying terminal by the or each data server (18, 20).

18. A system (10) according to ~~any preceding claim~~ claim 1 in which the electronic data obtained from at least one data server (18, 20) is determined by a person controlling operation of the supplying terminal (12).

20. A system (10) according to ~~any preceding claim~~ claim 1 in which the price at which the electronic data is sold is determined by a person controlling supply of that electronic data to mobile terminals (14).

21. A system (10) according to ~~any preceding claim~~ claim 1 in which the mobile terminal (14) is a mobile telephone.

22. A system (10) according to ~~any of claims 1 to 20~~ claim 1 in which the mobile terminal (14) is selected from a group consisting of game playing devices, portable audio players, portable video players personal digital assistants and smart telephones.
